

NATURAL MATERIAL STATEMENT

As with all-natural materials, European Wood Company surfaces can expect to have natural color tone variations due to varying acidity levels within the wood, different harvest times, different harvest locations and tolerances within the color finish application process. The degree of natural wood color variation often referred to as "color range", can vary from production batch to production batch and product to product. As you consider your surface material selection, please note the color range is a natural characteristic of the authentic wood surface. Lighting, photography, and electronic device displays are a significant factor in the marketing appearance of wood products; the actual physical samples should be placed in the environment in which the wood will be installed prior to purchasing.

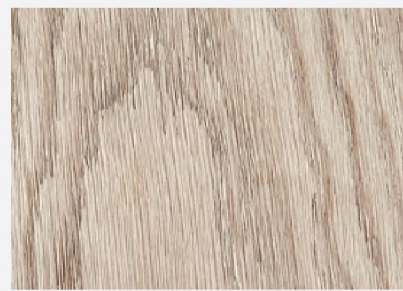

WHAT TO EXPECT

COLOR VARIATION / RANGE

FILLED KNOTS *

SMOOTH, EASED EDGES *

VISUAL CHARACTERISTICS

Surface Texture: Lightly Brushed

Open Grains: Yes

Knots: Yes

Knots Size: Small to Large

Prefinished Color From Fumed:** No

Can Wood Be Stained After Installation: Yes

Can Wood Be Resanded: Yes 2-3 times

SELECTION TYPES

Engineered

The Engineered Wood Collection is made up of hand-selected French Oak top layers. Our Engineered wood is available in a variety of elegant traditional patterns including the Parquet, Herringbone, and the timeless Chevron. The Engineered floors are suitable for different climates. This specific wood is made to expand and contract depending on humidity and temperature and is moisture resistant. The floors are constructed of layers including a thick French Oak-top layer, and our multi ply core™ premium substrate suitable for use with radiant and underfloor heating systems. All of our Engineered floors are FSC Certified

Solid

Our Solid Collection comprises hand-selected hardwood floors by expert craftsmen from France. The collection is available in a variety of elegant traditional patterns including the Parquet, Herringbone, and the timeless Chevron. It is also offered in a range of plank widths, colors, and textures. All of the wood in the Solid Collection is FSC Certified

BLANC

French Oak | Light Brushed | Light Textured

ABOUT UV POLY FINISHED HARDWOODS

The French Oak Collection comprises of solid and engineered hardwood floors, all hand-finished by skilled artisans. We offer a wide range of plank wood with custom sizes, colors, and textures that create our coveted collection. The unique character of each plank is achieved by implementing a variety of techniques to obtain particular textures and patinas. This wood has been lightly fumed for a distinct and sophisticated look with its depth of color and tone.
